FINISH  
GUIDE**

MERRILLAT CABINETRY

## Wood Type

### Maple (M)

Maple features a very consistent, uniform fine grain that takes color quite well. It is available in nearly every color combination.

### Oak (O)

Oak is a heavy, hard wood, with a medium-fine, noticeable grain. Its dramatic lines play quite differently off of each color.

### Cherry (C)

Cherry is moderately hard and heavy, with a fine-to-medium uniform grain. Its color can be different depending upon the stain used. Expect variations.

### Hickory (H)

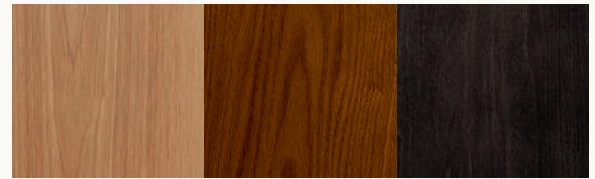

Hickory is a very heavy, hard wood, and has a grain with quite a bit of variance. This creates a design element in and of itself, taking on colors in unique ways.

## Finish Type

### Paint

Offering eye-catching colors that express your style and consistent coverage, paint is a great option for achieving a sleek, uniform look. When paint is selected, the drawer front, door stiles, rails, and/or center panel may be constructed of a paint-grade substrate, that provides resistance to warping, expansion, and contraction.

### Stain

Stains allow the natural beauty of wood to show. Each wood species has its unique grain variation and can have a dramatically different look when stain is applied. The amount of grain and natural beauty marks of wood vary by species.

## Door Type

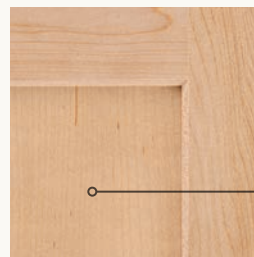

### Partial Overlay (P0)

Overlay is the amount of face frame covered by the door and drawer. The reveal on partial overlay cabinets is typically 1 inch. A partial overlay creates a traditional look and is typically less expensive.

### Full Overlay (F0)

An overlay that covers most of the face frame, giving prominence to the door and drawer design. A full overlay creates a more custom and clean look.

### Recessed Center Panel

The center goes inward. Recessed panel designs offer an understated elegance to your cabinetry.

### Raised Center Panel

The center panel is raised. It provides design dimension and interest.

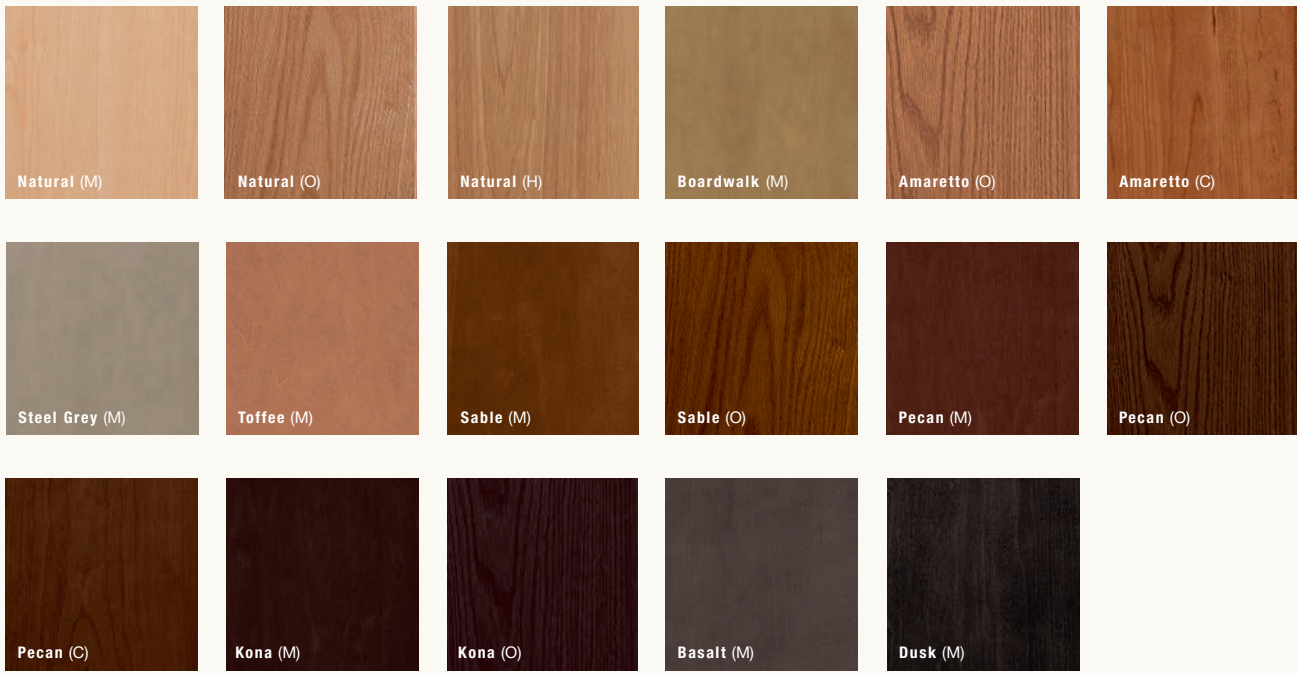

### Slab Panel

A flat panel with no variance in the center. It provides a clean, modern look that dares to be simple.

# CRAFTED WITH PRIDE

The Merillat® Mission: to build exceptional cabinetry that's as durable as it is beautiful.  
For complete details and additional upgrade information, visit [Merillat.com](http://Merillat.com).

## BUILT TO LAST

### *Durable Standard Construction*

#### **DURABLE FINISH**

Multi-step finishing system provides added value with a protective topcoat to resist scratching and stains.

#### **QUALITY CONSTRUCTION**

Industrial-grade 3/8" thick, engineered wood end panels attached using wood-to-wood glue and staples. Furniture-grade plywood construction upgrade available to meet your project needs.

#### **SOFT-CLOSING DRAWERS**

Full-extension, solid wood dovetail craftsmanship with drawer glides featuring the SoftAction™ design to reduce noise and pinched fingers.

#### **SOFT-CLOSE FUNCTIONALITY**

SoftAction six-way adjustable soft-closing door hinges to help ensure precise alignment and reduced noise for years to come.

#### **ABOVE AND BEYOND**

Meeting and exceeding Kitchen Cabinet Manufacturers Association (KCMA) standards, Merillat cabinets are a long-term investment in a home's overall value. To learn more about KCMA standards, visit [KCMA.org](http://KCMA.org).
